

TPOS⁺ 零售及批發 庫存管理系統

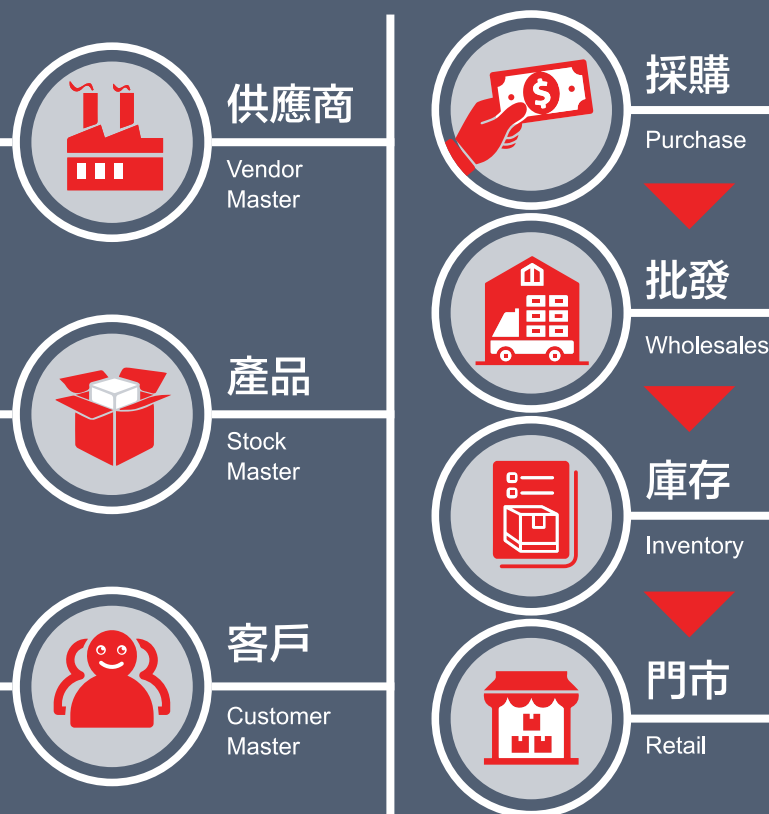

TPOS⁺ Management System

TPOS⁺ 零售及批發 庫存管理系統

系統結構 System Structure

TPOS⁺ 零售及批發 庫存管理系統

是一套完善的POS解決方案系統，功能全面且擴充性強。系統可以連結前後台的軟硬件，有效縮短前台結帳及後台批發的流程。系統主要包含四大部份：採購、批發、庫存及店鋪零售。只需掃描貨品上的條碼，或輸入貨品編號，便可即時入貨和出貨；單據、文件即時自動列印；亦可以實時查詢貨品庫存。透過分析系統數據，令你輕鬆掌握詳細的營業分析，準確了解商品的銷售情況，從而提高業務效率及市場競爭力。

TPOS⁺ Management System

is a versatile point-of-sale (POS) solution with comprehensive features that supports expansion. The system is connected to both front- and back-end software and hardware, effectively shortening the process of front-end payments and back-office operations. TPOS⁺ helps you manage four key areas: purchase, wholesale, inventory and retail. Whether you want to restock an item or deliver it, either scan the barcode on the product or enter its number or name. Bills and other relevant documents are printed automatically and instantly, while real-time inventory tracking is also available. By analyzing data generated by the system, you can easily keep track of your sales and inventory, which helps to improve your business efficiency and competitiveness in the market.

Q

系統如何管理多間店舖及倉庫？
How does the system manage multiple shops and warehouses?

A

TPOS⁺ 提供連鎖店版本，可以一站式管理多間店舖及倉庫。系統會詳細記錄貨品庫存、顧客交易紀錄及供應商進貨紀錄等資訊，作進一步的分析。
TPOS⁺ offers the option for multi-shop management – a one-stop platform to manage multiple shops and warehouses. The system records details of inventory goods, transactions and shipments from vendors for further analysis.

Q

如果電腦壞了，系統的資料會流失嗎？
Will the system's data be lost if the computer is broken?

A

系統內置強大的數據備份功能，所有系統主數據及銷售數據都會完整備份，確保系統資料的完整及安全。
The system comes with a powerful data backup feature. All of the system's master data and sales data are fully backed up in a single file to prevent data loss and ensure safety.

Q

我擔心系統太複雜，員工不懂如何使用？
I am worried that the system is too complicated for our staff?

A

客戶可以放心，因為TPOS⁺ 設置的介面是非常容易操作，我們也有定期提供培訓班。如果日常遇到甚麼操作問題，客戶或其員工可以隨時致電、電郵或WhatsApp我們的支援團隊。透過網路遙距支援，亦可直接連線到系統電腦解決問題。
Customers can be rest assured that TPOS⁺ configuration interface is extremely easy to use. We also provide regular training sessions. In case of operational issues, customers or their employees can contact our support team by phone, email or WhatsApp. We can help through remote support or by connecting directly to the system to solve the problem.

Q

系統有使用者權限的限制嗎？
Can I set user permissions and restrictions with the system?

A

系統管理人員可自行設定每個登入用戶的操作等級及權限。
System admins can set each user account's permissions and restrictions.
